Re: Office Pad Drainage, ASCA Area - Z
West Ridge Mine

Dear Ms. *Littig*

Enclosed are 5 copies of a revised proposed amendment to the West Ridge Mine Permit. This amendment is simply to change the runoff treatment method from the Office Pad - ASCA Area - Z from the total containment to treatment with an oil/grease separator and sediment trap. This submittal addresses the deficiencies noted in the April 26, 2000 letter from Mr. Daron Haddock. Please disregard the previous submittal, since all changes for the amendment are being resubmitted.

Drainage from the pad area is now proposed to be collected at the southeast corner, treated by flowing through an oil/grease separator and discharged to the stream channel via a 12" C.M.P. culvert to prevent erosion. This will allow for more beneficial use of the office/parking area, while still providing adequate sediment control and runoff protection.

Required C₁/C₂ Forms are enclosed, along with revised pages and maps. If you have any questions, or need further information, please let me know.
